I think that this means April 4-8!

I am talking to my manager about all these today.

Ok, gang. I confirmed with the RPM today that we are scheduled to complete a survey and place samplers Aug 4-8.

I will firm up travel times, team members, logistics etc. tomorrow (Thursday). We may need to arrive in Houston Sunday evening.

We need to collect the samplers approx 5-6 weeks after placement. This lands us on the weeks of May 9 or 16. This visit should only take a day or two and may require a smaller crew.

I will send you all additional details tomorrow. I really do appreciate your patience so very, very much!
